Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

PATDOCTC@fr.com

Application No. Applicant(s) 09/757.389 ADDANTE, FRANK Office Action Summary Examiner Art Unit Arthur Duran 3622 -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS. WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status 1) Responsive to communication(s) filed on 01 October 2008. 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 13-24 and 26 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) _____ is/are allowed. 6) Claim(s) 13-24 and 26 is/are rejected. 7) Claim(s) _____ is/are objected to. 8) Claim(s) are subject to restriction and/or election requirement. Application Papers 9) The specification is objected to by the Examiner. 10) The drawing(s) filed on is/are; a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abevance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner, Note the attached Office Action or form PTO-152. Priority under 35 U.S.C. § 119 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) ☐ All b) ☐ Some * c) ☐ None of: Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claims 13-24 and 26 have been examined.

Response to Amendment

The Amendment filed on 10/1/08 is sufficient to overcome the prior rejection.
 However, a new 35 USC 103 rejection has been made.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/1/2008 has been entered.

Flection/Restrictions

Claim 1-12 are withdrawn from further consideration pursuant to 37 CFR
 1.142(b) as being drawn to a nonelected invention. Election was made of Group II or claims 13-24 in the reply filed on 7/31/06.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3622

 Claims 13-24 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Angles (5.933.811) in view of Hu (6.173.322).

Claim 13: Angles discloses:

a creative selection server <u>coupled to a network;</u> (Fig. 2, item 18; Fig. 4, item 18;)

a content server, coupled to the network separately from the creative selection server (Fig. 2, item 14; Fig. 4, item 14), that issues at least one redirect command to a user computer in response to receiving a user request for non-advertising content, wherein the redirect command is configured to direct the user computer to a direct connect server (Fig. 4; Fig. 3, items 302, 304, 306; col 15: 1-12); and

the direct connect server being connected to the network; and the the creative selection server and <u>the content server</u>, being separately connected, wherein the direct connect server (Fig. 2):

receives creative selection criteria from the user computer (Fig. 3, items 304, 306, 308, 310; Fig. 4); and

responsive to the user request to receive non-advertising content and the at least one redirect command from the content server (Fig. 4, Fig. 3):

generates a request for a creative message as a function of the creative selection criteria (Fig. 4; Fig. 3):

transmits the request for the creative message to the creative selection server (Fig. 4; Fig. 3);

Art Unit: 3622

receives an identification of one or more creatives from the creative selection server (Fig. 3, item 310); and

sends the identification of the one or more creatives to the user computer (Fig. 3, item 310; Fig. 4, step F; Fig. 1; Fig. 2).

Notice in the above citations from Angles the following. Angles discloses above in Figures 3, 4, and 2. In Figure 2, Angles discloses that the user, creative selection server/advertiser; and content provider can all communicate with each other. Angles discloses that the user requests content from the content server (Figures 3, 4). The content server then returns the content to the user and also a redirect command that redirects the user to the advertisement provider in order to receive the advertisement content (Fig. 3, 4; Fig. 4, item 32; col 15: 1-12). Notice in Angles that the user receives the content form the content provider server. And, the user receives the advertisement content directly from the advertisement provider (col 13:20-31). And, the advertisement provided to the user is based user information such as user preference information and also that the ad can be relevant to the content provided (Figs. 3, 4). Hence, Angles discloses all the above.

Angles discloses an advertisement provider service with a multitude of databases and servers (Fig. 4, item 18; Fig. 2, item 18). Angles does not explicitly disclose that the advertisement provider can utilize both a direct connect server and a creative selection server in order to perform the functions of the advertisement provider computer. Angles also does not disclose that the direct connect server and creative selection server are separately connected to the network.

Art Unit: 3622

Examiner notes that Applicant's direct connect server is minimally defined.

Examiner could only find Applicant's Paragraph ([15]) to see what the direct connect server is or what it does.

Regardless, Angles discloses a variety of server configurations at the advertisement provider for handling ad request, ad selection, and ad providing (Fig. 4, item 18; col 6: 4-12; col 13: 35-46; col 14:59-67). Hence, it would be obvious to one skilled in the art that Angles can use more than one server to perform the advertisement provider functions. One would be motivated to do this because the features are merely a combination of old elements, and in the combination each element merely would have performed the same function as it did separately, and one of ordinary skill in the art would have recognized that the results of the combination were predictable.

And, Hu discloses that when a content request is made that a Network Request Manager can be directly connected to the Internet and provide information to one of many Content Servers which are also directly connected to the Internet. And, that the Content Server can then provide the content to the user (Fig. 1; Fig. 9b; Abstract). Hence, Hu's Network Request Manager functions as the Applicant's claimed direct connect server and Hu's content server functions as the Applicant's claimed creative selection server.

Hence, it is obvious that Angles advertisement provider functions can be performed by more than one separately connected servers. One would be motivated to do this in order to more efficiently provide the content (as Hu discloses).

Art Unit: 3622

Claim 14: Angles discloses the request for creative message of claim 13 further defined as a function of a stored profile (col 13:20-31).

Claims 15, 16, 18:

The prior art discloses the above. Angles does not explicitly disclose using IP address for targeting.

However, Angles discloses utilizing the IP address and the content provider as relevant communications information and utilizing the Internet Service provider of the user as relevant criteria for selection/targeting purposes (col 7, lines 10-26; col 9, lines 20-30; col 9, lines 35-45; col 10, lines 20-34; col 14, lines 15-26; col 16, lines 25-38; col 17, lines 3-10).

Angles further discloses that domain name of the content server can be a criteria (col 11. lines 17-26).

Also, it is old and well known that different Internet Service Providers are going to utilize different domain names.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to that IP information or domain information can be utilized as a criteria in Angles's targeting based on a range of criteria. One would have been motivated to better use available information for targeting.

Claim 17: Angles discloses the request for creative message of claim 13 further defined as a function of whether or not the user computer has previously connected to the content server (Fig. 5; col 13:20-31). Note that the user registers and that a profile is kept. Hence, new users are known.).

Art Unit: 3622

Claim 19: Angles discloses the request for creative message of claim 13 further defined as a function of a search term entered by the user computer (2:20-30; 6:5-15).

Claims 20, 22: Angles further discloses that the content server that placed the content can be a criteria for the advertisement that is provided (col 13:20-31).

Claim 21: Angles discloses the request for creative message of claim 13 further defined as a function of whether or not the user computer has previously connected to the direct connect server (Fig. 5; col 13:20-31). Note that the user registers and that a profile is kept. Hence, new users are known.

Claim 23: Angles discloses the request for creative message of claim 13 further defined as a function of a meta tag on the content server (col 13:20-31).

Claim 24: Angles discloses the direct connect server of claim 13 further comprising a lookup table for storing category codes for use in generating a request for creative message (col 15: 30-42).

Claim 26: Please see the rejection of claim 13 above and particularly the citations to the Hu reference

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new grounds of rejection above. Please particularly note the rejection of independent claim 13 above.

Conclusion

The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Art Unit: 3622

a) McCanne 20050010653 at Abstract; Primak 20020010783 at (claim 13); Joffe (6185619) at (Det Paragraph 58); and Lewis 6553376 at (Det 28) disclose relevant features to distributing/spreading server loads across content servers when content is requested. These also disclose relevant features to redirecting and direct connect servers.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arthur Duran whose telephone number is (571)272-6718. The examiner can normally be reached on Mon-Fri, 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eric Stamber can be reached on (571) 272-6724. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
